URGING PENROSE FOR STATE CHAIRMANSHIP

Suggestion of "The Republican" is Cordially Indorsed.

WOULD NOT DECLINE

Friends of Senator Confident He Would Accept—No Action Until State Convention Meets in June—His Election Probable.

All indications point to the selection of Senator Penrose as chairman of the Republican State Committee, to succeed the late Colonel W. R. Andrews. A movement looking to this end has been inaugurated by prominent Republicans in all parts of the State and it is entirely probable that Senator Penrose will yield to their request that he assume the chairmanship.

Several weeks ago it was the pleasure of "The Republican" to suggest that Senator Penrose be elected to head the State Committee. The suggestion has been taken up with enthusiasm by many other Republican newspapers in the several counties of the State. Appreciating the call upon his services, Senator Penrose probably will accept. His recognized ability qualifies him for the honor. Under his active leadership the State organization would be aroused to enthusiastic work for the ticket.

Events of the last five months warrant the statement that the Democrats and insurgent Republicans are planning a vigorous fight in November for Governor, Lieutenant Governor, Secretary of Internal Affairs and also members of Congress and the State Legislature. A new State Treasurer will also be elected next November, this being necessary owing to the death of State Treasurer-elect J. A. Stober. Governor Stuart has been advised that he may appoint a temporary State Treasurer, but the office must be filled by election in November, so that this makes one more office for which the Democrats and discontented Republicans will strive to capture.

The Legislature of 1911 will elect a United States Senator for a six years' term. Senator Oliver, who is serving the unexpired term of Senator Knox, is expected to become a candidate for the full term. That he has demonstrated his fitness for the high honor during his brief term at Washington is conceded by all who have closely observed his course in the Senate. Such opposition as has thus far developed to Senator Oliver is an opposition founded on a desire to see the Republican party in Pennsylvania disrupted. Any movement which is dishonest in its purpose and which is therefore founded on false pretense, must be short-lived.

With Senator Penrose at the helm notice will be at once served on the Democrats and fly-by-night Republicans that the Republican party in Pennsylvania will be on the aggressive and not on the defensive in November. Senator Penrose served as State Chairman prior to the election of Colonel Andrews. It is to be hoped that he will consent to head the State Committee.

No action need be taken in the matter until the State convention in June. At that time, we therefore suggest, the convention should exercise its authority and formally name Senator Penrose for the honor. We confidently venture the prediction that if the convention adopts this course, Senator Penrose will not decline.

Fire at Macker's Store.

The explosion of a patent gasoline cigar lighter in Macker's store on Tuesday morning caused a slight fire which, however, did considerable damage. The presence of mind of several who were early on the scene probably prevented a disastrous blaze. Running to an emergency hose in the hall of the building, they quickly had a stream on the fire. There was so much smoke for a time that many persons thought the entire building was in flames. The damage to the building is slight. Mr. Macker had quite a lot of stock destroyed by fire, smoke or water.

Immersed in Marsh Creek.

Thirteen persons were immersed in the icy waters of Marsh Creek, near Blanchard, on Sunday, last. A hole was cut in the ice for the purpose. A majority of those immersed were among those converted during the revival of the Baptist church at Blanchard. The immersions were made by the pastor Rev. Burrows Eldridge, and were witnessed by fully 500 persons.

A. M. E. CHURCH BURNED

Fire Destroys Edifice on Sunday Morning.

Fire on Sunday morning, last, completely destroyed the African Methodist Episcopal Church. The building and contents were burned. When the flames were finally extinguished all that was left of the building were the blackened ruins of two walls, and these so badly damaged that they will have to be taken down.

The church building and contents were valued at $2,500, with $1000 insurance. While it is too early for announcement of definite plans, the congregation contemplates rebuilding at the earliest possible date.

It is supposed that the fire was caused by a spark from the furnace in the basement. Fire was lighted in the furnace to heat the church for the regular Sunday services. It is thought that a spark from the furnace fell upon some paper scraps on the floor nearby, and that this developed the blaze which was to consume the building.

It was shortly after 9 o'clock when the fire alarm was sounded. Great volumes of smoke soon indicated the location of the fire. By the time the fire companies had arrived and streams of water were in play, the flames had gained considerable headway. The interior of the building was already a mass of flames and the structure, built of wood, burned rapidly. No little anxiety was felt by residents of the neighborhood lest the flames should spread to nearby houses. Fortunately, the firemen confined the fire to the church and surrounding buildings escaped unharmed. At one time the fire threatened to spread to the home of Mrs. Mariah Green who was ill, and she was removed on a stretcher to a place of safety.

REUNION OF 45th REG'T.

Famous Fighters Meet at Williamsport March 2-3.

A reunion of the famous fighting regiment, the 45th Pennsylvania Volunteers, will be held at Williamsport, on Wednesday and Thursday, March 2 and 3. All indications are that the affair will be a splendid success. General Collins and the Mayor of the city will welcome the "boys in blue." General Beaver, General Curtin, Judge Richards, of Ohio; Major Cheesman, with a large squad from Washington, D. C.; also some of the Kansas boys, will be there.

A glowing campfire is billed for the evening, when many logs will be rolled on and the fire kept a-blazing. The thirty-four battles in which the command took part will be fought over and over again. The Washington Association will have charge of the sessions and the meetings. Of the 1965 men in the regiment, but about 460 are left. The boys of the 45th were among the bravest and most gallant to participate in the war. In the last few months 18 comrades have answered the final roll call. The last one to go was Dr. Theodore S. Christ, of State College. He was surgeon.

This probably will be the last reunion for many of the "boys", so let there be as big a turnout as possible and thus make it a memorable event in the great history of a great regiment.

READY FOR COURT

Work Rushed to Complete Alterations By Next Week.

The court room of the remodeled Court House will be ready when the February term is convened on Monday morning next. A large corps of men have been steadily on the job, with hurry up orders, and as a result the room will be ready for occupancy next week. Jurors, witnesses and others who have not seen the room since the alterations have been under way, will be pleasantly surprised at the marked change.

New seats, a new ceiling and a general remodeling of the judge's bench, jury box etc., greet the eye as one enters the court room. An innovation in Centre county courts is a witness box. The jury box is unusually high in the rear. The judge's bench is, perhaps, somewhat lower than that formerly used.

The general plan of the room is brown and white. The seats are a dark brown. The decorators have still to give walls the finishing touches. When completed the court room will undoubtedly be very pretty.

Farmers Moving to Illinois.

The population of Aaronsburg will be materially lessened this week as a number of its citizens are going to Plainsfield, Illinois. Among the number are William Weaver, Grover Beaver, Frank Stover, F. P. Minnick and family, W. E. Beaver and family, Weaver Edmunds and family, Charles Haines and family, and F. S. Tomlinson and family. W. H. Condo and family, of Brush Valley, and Thurman Braught, of Coburn, will also be in the crowd. Here's wishing them luck.

KEICHLINE FIRES HOT SHOT INTO CHM. ZERBY

Says He Shamelessly Betrayed Democratic Ticket.

ISSUES A CHALLENGE

Defeated Squire Declares Zerby Dare Not Seek Re-Election as Chairman and if He Does Will Take Field Against Him.

Justice of the Peace John M. Keichline, who was defeated for re-election last week, yesterday poured hot shot into Democratic County Chairman Zerby, charging the latter with party treason and with having forfeited his right to be called a Democrat. Justice Keichline further declared that if Zerby presented himself for re-election as County Chairman, he (Keichline) would take the field as a candidate against him.

County Chairman Zerby and other Democrats openly knifed Keichline at the polls. Keichline announced that he would bide his time and that in the end he would be revenged. To a representative of "The Republican," Justice Keichline said :

"Although he has the title of Democratic County Chairman, Zerby is not a Democrat. He is a traitor to the Democratic party. He deliberately betrayed his party ticket. His duty as County Chairman was to loyally aid the nominees of his party. Instead of doing this, Mr. Zerby deliberately worked for the Republican nominee, Mr. Brown.

"Zerby can't be re-elected Democratic County Chairman. Even those who helped him defeat me will not be for him for re-election as chairman. As County Chairman he has been a failure; yes, worse than a failure. If he attempts to be a candidate for re-election as chairman, then I'll be a candidate against him. Let him become a candidate for any office in the futufe, or let him put forward any candidate or candidates for office. He will learn that I am in the field, that I have not forgotten his treachery to his party last week. His party treason was cowardly and disgraceful.

"The history of this thing is simply this: Zerby and a few other so-called Democrats, slated 'Jim' Corl for the nomination for Justice of the Peace. I defeated them and was nominated at the Democratic caucus. Then Zerby and his crowd got together in the office of Orvis, Bower & Orvis, and figured out how they might beat me at the polls. W. C. Cassidy had been nominated by the Republicans. Zerby was of the belief, and said so, that Cassidy couldn't defeat me. He said that if Henry Brown could be put on the Republican ticket he (Zerby) would guarantee enough Democratic votes for Brown to defeat me. This, mind you, from the Democratic County Chairman. Mr. Zerby went to Henry Brown and urged him to go on the Republican ticket, guaranteeing him all of the Democratic votes that had been controlled against me at the Democratic caucus.

"Several meetings were held by Zerby and his clique. I was not invited to these meetings. Zerby and some others raised a fund of $400 or more and this money, which should have been used to aid in electing the Democratic ticket, was used to defeat me, a Democratic candidate.

"On election day, Zerby worked openly at the polls against me. He was without shame or any regard for party loyalty. During the morning hours of election day Zerby and his little band saw that I was getting away with things. They started in about 2 o'clock and resorted to methods which captured a certain element and thus made possible my defeat.

"The Democrats of Centre County have a right to know of the treason to their party by the man elected as their chairman. As I have said, I'm waiting. Let Mr. Zerby attempt to come out for anything in the future and he'll hear from me.

"I understand the Zerby crowd have slated Fred Musser for another term in Council. Musser may conclude not to run, but from what I am told, he has been slated. Well, he is one of the Zerby Democrats who knifed me at the polls. He will do well to think things over before he comes up for re-election. He may decide that he prefers trudging along as a private citizen."

INSTITUTE AT YARNELL

Interesting Sessions Held on Friday and Saturday.

An interesting program was rendered at Local Institute No. 2, District No. 4, which convened at Yarnell on Friday and Saturday of last week, with Miss Florence Leathers as chairman. It was a complete success in every respect and greatly enjoyed by all present.

The following teachers from Milesburg, Eagleville, Shoe Shoe, Howard, Mt. Eagle and Yarnell were present: Professor Robb, Miss Hanna, Miss Irvin, Professor F. Milford Pletcher, Robert Barnhart, Chester Miles, Anna Dietz, Ethel Bitner, Pearl Gates, Wilbur Leathers, W. C. Thompson, W. Scott Holter, Wilbur Glossner, Bessie Johnston, Anna Shank. Nancy Kelley, Florence Leathers, from District No. 4; Professor Bower, Harry Leathers, Miss Zindle, Miss Parks, Elmeda Pownell, Samantha Pownell, Miss Hunter, Miss Graham, Puella Glossner, from Beech Creek, Mrs. Bertha Woomer, Mrs. William Shawley, Mr. Haines and Mrs. George Musser were ex-teachers.

The subjects "Climbing the Ladder," "Economy of Time and Effort in the Mixed Schools," "Your Method of Interesting Pupils in Geography," "Arithmetic in the Higher Grades," "What Can the Public School Do to Promote Sociability," and "Mistakes in Teaching and How to Correct Them" were discussed with much enthusiasm and interest. Professor Bower and Harry Leathers, who often spend half the night in debate at Snow Shoe, proved their ability.

The program was interspersed with music and recitations by Anna Dietz, Ethel Bitner, Samantha Pownell, Amber Confer, Wilbur Glossner and Miss Zindle.

The people of Yarnell opened their homes and gave the visitors a hearty welcome which made each one wish such events would come often and aid in making life one sweet song.

DAMAGE SUIT RUMORED

Bellefonte Girl, it is Reported, Will Ask $10,000 Damages.

For several weeks rumor has had it that a Bellefonte young woman contemplates entering suit for breach of promise against a Butler county politician and claiming $10,000 in damages. Inquiry at the Court House met with the declaration by Prothonotary A. B. Kimport that no suit of the kind had been filed in the Centre county courts.

The Butler county man, it is said, was devoted to the young woman in question until a short time ago. Recently he was married to another woman. From the time of his marriage it has been rumored that suit would be entered against him. In the last few days the rumors have been revived and friends of the young woman look for action on her part at any time.

Reception at Port Matilda.

One of the prettiest and most delightful receptions given in Centre county for many years was that on Saturday, February 12, at the home of Mr. and Mrs. Abraham Woodring, at Port Matilda, in honor of Mr. and Mrs. George W. Woodring, of Bluefield, West Virginia. A most enjoyable time was had by all present. Those present included Mr. and Mrs. A. R. Williams, County Commissioner and Mrs. Jacob Woodring, Mr. and Mrs. George Price, Mrs Charles Crain, a niece of Mrs. Woodring; Mrs. Scott Miles, Mrs. Stine, Mrs. Alexander Chaney, Mr. and Mrs. John Q. Miles, Mrs. A. W. Reese, Mrs. J. A. Thompson, Mrs. H. A. McKinney, Mrs. C. W. Crain, Mrs. G. R. Williams, Mrs. H H. Osman, Mrs. C. M. Pringle, L. H. Ellis and Mrs. Woodring, the aged mother of Abraham Woodring.

Home Destroyed by Fire.

Fire on Saturday afternoon, last, destroyed the home of Frank Barret, near Milesburg. Mr. and Mrs. Barret were at Bellefonte at the time. By the time the flames were discovered they had gained considerable headway and the house was soon reduced to ashes. A part of the furniture and other household effects were saved. The loss is about $800, partly covered by insurance.

Fruit Growers at Rebersburg.

The Centre County Fruit Growers' Association will hold a meeting at Rebersburg on Friday evening and Saturday morning, March 18 and 19. This will be the third meeting of the association. Professor Stuart, of State College, will deliver the principal address.

Dogs Running Deer.

It is high time somebody should get busy and kill a few dogs in the vicinity of Coburn. For some weeks past dogs have been running deer in the mountains by Lick Hollow. Several deer have been found, dead and almost eaten up.

TRAIN LECTURES HERE ON ORCHARD CULTURE

Demonstration Tour Includes Centre County Towns.

TWO DAYS IN MARCH

Special Train Scheduled to Visit Fowler, Julian and Bellefonte on March 4, and Centre Hall and Coburn on Following Day.

The demonstration train of the division of Economic Zoology of the State Department of Agriculture will visit Centre County on Friday and Saturday, March 4 and 5. The train is in charge of State Zoologist H. A. Surface, who is touring the several counties of Pennsylvania to further enlighten the people on the importance of orchard culture.

The train, with Professor Surface and other speakers aboard, is scheduled to arrive at Fowler, on Friday afternoon, March 4, at 1:05, and after a stop there until 2:20 o'clock, will proceed to Julian. The train is scheduled to remain at Julian from 2:40 to 4 o'clock.

Bellefonte will be the next point at which the train will stop, being scheduled to arrive here early Friday evening. The program for this place calls for lectures between the hours of 7 and 9 o'clock.

On Saturday, March 5, the train will make its first stop at Centre Hall, arriving there at 8:19 and remaining until 9:45 o'clock. From Centre Hall the train will go to Coburn, where a stop will be made from 10:10 to 11:40 o'clock. All lectures are in the train and are free to the public.

Last week the train was taken through the picturesque Cumberland Valley. In a speech at Mechanicsburg, Professor Surface announced the following preliminary report on experiments in spraying, etc:

First. Dipping peach trees for San Jose scale. The Oregon law requires that trees be dipped instead of fumigated. All of Professor Surface's trees that had the roots dipped in lime-sulphur solution were killed, but those with the tops only dipped were not harmed, and the scale was killed.

Second. Tests for hardiness of fumigated trees. Fumigated and unfumigated trees were planted side by side, testing pear, apple and peach. In all cases the subsequent growth was the same, but the scale and peach borers were all killed by fumigation. He recommended all growers to order their trees fumigated before shipping.

Third. Tests of hardiness of trees from North and South. Trees of the same kinds from the extreme North, from the Middle States and from the South were planted at the same time and in the same orchard. All grew equally well, and the professor has concluded that the vigor of a tree does not depend upon the region in which it was started, but upon the place where it was grown and the care it is given. This explodes the common theory that to be hardy trees must be ordered from an extreme northern climate.

Fourth. For stimulating young trees at critical periods. Tests of various vegetable alkaloids and other plant stimulants were made on recently planted trees that were not starting well, and it was learned that nitrate of soda applied at the rate of an ounce in a bucket of water was most effective means of stimulating growth at a critical period.

Fifth. Root pruning and the Stringfellow method of planting. This method consists of cutting off all the roots and tamping the tree firmly into a small hole. Two rows were planted with the roots trimmed off entirely, two with the roots only an inch long and two with full root. All grew equally well. This is evidence that the life of the tree is at the crown or union of trunk and root, and that the chief essential in making it grow is to make good earth grip in firmly.

Sixth. Planting in wood ashes for root aphis. Trees planted in wood ashes stirred into the soil at place of planting did not suffer from root lice, while some of those in check plots, not treated, were attacked and died.

Seventh. Planting in wood ashes for peach borers. These pests were prevented by the use of wood ashes in the soil around the roots and crown.

Mrs. Jane Welsh Dead.

Mrs. Jane Welsh died late last night at her home in Bellefonte. She had been in a critical condition for several days. She was aged about 88 years and was a daughter of the late Rev. James Linn. Her mother was a daughter of the late James Harris.

DEATH OF JOHN JENKINS

Passes Away at Late Home at Milton After Brief Illness.

After an illness of one week, John Jenkins died at midnight on Friday, last, at his late home at Milton. His death was due to pneumonia. Mr. Jenkins was taken ill on returning to his home from Williamsport. He gradually became worse and despite all that attending physicians and loving hands could do, he passed away. Interment was made at Milton on Tuesday, at 2:30 o'clock.

John Jenkins was born at Blaina, South Wales, December 26, 1837, and was a son of William Jenkins and Elizabeth Richards, who were married November 30, 1836, by Rev. W. B. MacKenzie, Parish of St. James, Bristol, England. He was the eldest of a family of four children, as follows: John, William Jenkins, born December 1, 1839, died in Wales, November 5, 1840; William Rees Jenkins, born in Wales, February 1, 1843, died at Bellefonte, April 9, 1908; Hannah R. Jenkins, born in Wales, July 21, 1845, married to Dr. E. S. Dorworth, and residing at Bellefonte.

The family of William and Elizabeth Jenkins resided for a time at Newport, Glamorganshire, South Wales. About the year 1853 they removed to America, crossing the ocean in a sailing vessel, and making their home at Danville, Montour county. From that point they finally removed to Howard.

The Jenkins family, father and sons were engaged in the iron business, William Jenkins having charge at one time of the old Howard iron works and later engaging in the same business at Williamsport. John and William Rees Jenkins were engaged with their father at Howard. Transportation during that period was entirely by means of canal boats and the sons frequently made the journey to Philadelphia and return in this manner.

From Howard John Jenkins removed to Milton, where for many years he was actively engaged in the operation of iron mills. In more recent years he was engaged in the manufacture of nails at the Williamsport mills, although continuing to maintain his residence at Milton.

In 1872 the Milton Iron Company was organized with Mr. Jenkins as superintendent and general manager. The plant of the old iron mill at Farrandsville, Clinton county, which had been financed by the Queen of Spain, was purchased, dismantled and removed to Milton. Mr. Jenkins and the late W. A. Schreyer subsequently purchased the Williamsport Iron Works. This was sold to the Milton Iron Company, which corporation erected the mill at South Williamsport, now owned and operated by the Williamsport Iron and Nail Company. Mr. Jenkins was general superintendent and general manager of this concern to the time of his death.

During his many years of residence at Milton he actively identified himself with public affairs. He was twice elected chief burgess and served several terms as a school director. He was an active member of the Board of Trade and twice served as its president. He was a man widely known and greatly admired and as a tribute of respect to his memory during the hour of his funeral the Milton public schools were closed and business in general was suspended.

On Thursday, February 10, Mr. Jenkins went to Williamsport on an early train, as was his custom. During the day he went to the railroad station to meet his sister, Mrs. Dorworth, who that evening accompanied him to Milton. Arriving at the West Milton station he suggested that they walk across the river bridge to his home. It was quite cold and they walked rapidly. Just before reaching his home Mr. Jenkins stopped at a barber shop to be shaved, telling his sister to go ahead and that he would meet her at his home. It is supposed that he contracted a chill while seated in the barber shop, for several hours later he became quite ill and a high fever developed. On the following day the attending physician, Dr. Miles, discovered that he was ill with pneumonia. By the time the fever had been conquered his system had become greatly weakened. He was unable to retain nourishment and sank rapidly, only to rally and renew his brave battle to fight off the disease. The strain, however, was too much for his heart and it finally failed to respond. Conscious almost to the last, and recognizing members of his family, sister and other relatives at his bedside, he slowly sank into restful sleep.

Mr. Jenkins is survived by a widow, who was Miss Lucinda Hull, of Centre county; three daughters, Mary, married to Lewis Ettinger; Annie, married to Oscar Foust; Grace, living at home, and two sons, Walter, residing at home, and William, also living at Milton. Two other children, David and Isabella, died in infancy.

TESTS IN PIG FEEDING

Results of Experiments at the Pennsylvania Station.

At the present price of corn, many hog raisers hesitate about feeding it, and must of necessity turn to some other and cheaper combination of feeds. Corn is hardly the best feed for the growing pig, anyway, as it is too fattening; it should be supplemented with one or more feeds rich in protein. Tankage has been found to serve this purpose very well. In fact, a number of experiment stations have been very successful in using this by-product of the slaughter houses in the pig ration. It makes better gains at a smaller cost than oil meal, and can be recommended as a good supplement to corn for pigs.

The Pennsylvania experiment station has recently published a bulletin giving the results of a feeding test in which white middlings were compared with corn chop and tankage. Middlings is an important pig food, but the question is whether it is more economical than corn. At the Wisconsin station it was found that when corn and middlings were used together in the same rations gains were produced 20 per cent more economically.

At the Pennsylvania station two lots of pigs of three each were selected for the test. They were pure bred Cheshires, all of the same litter, and were fourteen weeks of age when the test was begun. The experiment lasted seventeen weeks, closing on March 10. The feeds used were white middlings of good quality, costing $30 a ton; corn chop of good average quality, costing $34 a ton, and feeding tankage, at $28 a ton. The conclusions can be summarized as follows:

The pigs on the exclusive middlings ration were not as active and healthy as those on corn chop and tankage; neither did the former eat with the relish that the latter did. Pigs on corn chop and tankage made much better growth and development throughout the experiment. The three pigs on middlings made only a total gain of 337.5 pounds, while those on corn chop and tankage gained a total of 448.5 pounds. Neither ration proved very profitable for growing and fattening pigs. The corn chop and tankage had a slight advantage in cost per pound of gain. With corn chop at an average price the latter ration could be used to good advantage. Middlings, however, when fed alone proved to be an undesirable unappetizing and unprofitable ration when fed for any length of time. The hogs fed corn chop and tankage dressed out a noticeable better percentage; they could consume large quantities of feed with a relish and make much better growth and development in every way.

This experiment would indicate that it is not profitable to feed middlings alone, but that corn and tankage are a profitable combination for older hogs. Middlings are without doubt an excellent feed for young pigs previous to weaning and perhaps for a short time after, but beyond that they should make up only a small part of the ration for the growing and fattening hog.—*From the Farmers' Guide.*

A VALUABLE BULLETIN

Increasing Crops and Soil Fertility by System of Rotation.

A recent bulletin issued by the United States Department of Agriculture entitled "Replanning a Farm for Profit" deals with principles that are vital to successful farming in the corn belt. Few farmers realize the difference in income that may be produced on their farms by the systematic introduction and rotation of clover or other leguminous crops over the entire area of their tillable land. The planning of rotations to meet certain feed requirements and to grow crops which shall be the greatest income producers under given conditions is a problem that is not easily solved by all the tillers of the soil. The conservation of soil fertility by appropriate rotations, together with applications of manures and fertilizers in such manner as will maintain a permanent system of agriculture, has been largely overlooked by farm owners in the past. Farmers' Bulletin 370 assists the farmer in solving these difficulties. It discusses a run-down farm in Illinois, and plans six different types of farming that may be substituted for the usual one of corn and oats now practised, so as to raise the income all the way from two to five times as much as that commonly received, and at the same time increase the fertility of the soil. A copy of this bulletin may be had free on application to a member of Congress or the Secretary of Agriculture, Washington.

FAVORS COUNTY OPTION

Bryan Gives Statement Discussing Saloon Question.

William Jennings Bryan is now in favor of county local option. In a statement, given out at his home a day or two ago, he presented an extended argument in support of the principle of local option, and concluding said:

"The saloon—not every one, but as a rule—is an alliance with vice. It is constantly used to debauch politics and to prevent the intelligent consideration of public questions. The liquor interests interfere in all matters that may even remotely affect their interests.

"They made themselves odious in the last session of the Nebraska Legislature. The Democrats had a majority in both branches for the first time in the State's history, and the splendid record of the Legislature has but one blot on it, and that blot was put there by the liquor interests. They controlled enough of the senators to prevent the submission of the initiative and referendum.

"The Democratic party cannot afford to act as the mouthpiece of the liquor interests. It can have nothing in common with the selfish, mercenary and conscienceless crusade that the liquor interests have organized against the home and the State; against private virtue and public morals."

His Tokens of Farewell.

Among the legends that have gathered around Sir Alfred Jones' name is one to the effect that he was in the habit of signifying to an office visitor, by offering him a banana, that he desired to end the interview. If the banana was accepted and the call prolonged Sir Alfred arose and presented his visitor with a fine flower from one of the glass stands in his office. But, supposing his visitor stayed after the flower—well, the legend continues, Sir Alfred then offered a pass to the West Indies on one of his small steamers, with a free holiday for six weeks at his hotel.

It is told, however, that on one occasion Sir Alfred got the worst of the banana trick. A young reporter called on him to learn on behalf of his newspaper something about the shipping conflict. When, after a ten seconds' conversation regarding the weather, Sir Alfred's hand was straying toward the banana plate, the reporter hooked a couple of bananas out of his own pocket. In the sweetest tone of innocence he said, "Will you have a banana, Sir Alfred?"—Westminster Gazette.

The Vital Test.

"My eyes seem to be all wrong," explained Mr. Pinchpenny to the expensive oculist. "They're weak and tire easily. After a bit everything seems to swim before them. Bright lights make me dizzy. Can you assist me?"

The expensive oculist nodded.

"Your case is a common one," he replied, "but I fear it will necessitate a treatment extending over several months. However, I can guarantee an absolute and enduring cure."

Biweekly for several months Mr. Pinchpenny was treated, and day by day his sight waxed stronger and more strong.

"Do you think I'm all right now?" he inquired at last.

"Mr. Pinchpenny," replied the oculist, beaming, "I think I can assure you that your eyes are now cured. But there is one more test it would be as well to apply." Here he held up a little sheet of paper. "See," he said suavely, "if you can read this little bill of mine at twelve inches without blinking."—London Answers.

Diplomatic.

The late Lord Savile used to say that high diplomatists had always to be on their guard against intriguing women, mainly Russian agents, who would use any wile to extract information. During the Russo-Turkish war, when Europe was always on the verge of a crisis and Russian statesmen were most anxious to know what England would do under given circumstances, a lady came up to him suddenly at a ball and said:

"I hear that the Russians have made a forced march and entered Constantinople," hoping, no doubt, that he would be surprised into some indiscreet expression.

He merely replied:

"Indeed! And I suppose the sultan has conferred on them the order of the Turkish bath!"

The lady continued gravely:

"And they say in Paris that if England does not interfere the eastern question is settled in favor of Russia."

"And that," replied his excellency, "is, I suppose, the new judgment of Paris."

What Maggie Wrote.

The geography class was asked to write what they knew about London, and Maggie Jones wrote, "The people of London are noted for their stupidity."

"Where did you get that idea?" asked the surprised teacher.

Triumphantly Maggie pointed to this paragraph: "The population of London is remarkably dense."—St. Louis Post-Dispatch.

FRENCH DETECTIVES.

They Are Trained For Their Duties In a Regular Police School.

In Paris aspirants for positions in the detective force are taught in a regular school, where day after day they are put through various exercises until they become proficient and receive appointments or show that they have not the detective instinct in them.

The students first are trained in the use of their eyes and their hands. One of the lessons consists in placing the pupil in a brilliantly lighted room full of furniture and ornaments. Then he is taken to another room and required to make a sketch of the room he just has left, indicating the position of all the objects in it. He is allowed to look at a face for a minute and then required to describe the color of the hair, the eyes, the general form, etc. He afterward is required to pick out a photograph of the face from among several hundred others.

In educating the hand the student is placed in a dark room in which are many curious and unusual objects. These he feels over and then writes a description of them. He must remember even the slightest details. One test is to let him handle gems in the dark and then tell what they are, whether diamonds, rubies or what not. This is, of course, an exercise for the more advanced pupils.

CHINESE PRINTING.

The Compositors Are Staid and Dignified and Never Rush.

A font of type in the Chinese language requires 11,000 spaces, and in the large and spacious rack each word, instead of each letter, as in English, has a place by itself. There is also a peculiar grouping or classification of symbols into groups to further facilitate the mental labors of the typesetters. Thus in the immediate vicinity of the symbol for fish would be found the symbols of scales, net, fins, tail, gills. This simplifies the labor, which in any event must be so strenuous that it is evident that the compositor's end of the Chinese newspaper should, if perfect justice ruled, be the highest paid.

The compositor is a staid and dignified individual, and as he slowly walks from symbol to symbol, picking up those which he requires with provoking calmness, the American compositor might well wonder when the work would be completed, and to set up the type required for a small four page daily paper the constant labors of eight or nine skilled Chinamen are required for twelve or thirteen hours, the entire work in every department being the antipodes of the rush and whirl and marvelous celerity of the modern American publication.

He Obeyed Orders.

Old world domestics make the best parlor servants because they work like machines, never forgetting an order and doing exactly as they are told, without presuming to think for themselves. But once in awhile this literal adherence to duty produces some awkward results. An American woman living in India, with native servants, once told her butler to see that there was always a napkin at the bottom of the fruit dish, cake basket, etc., when these were brought to the table. The napkin was thereafter always seen in its place. But one day a tureen of vegetable soup was served, and the hostess began to wield the long, old fashioned silver ladle about in it. Something very like a fringed rag made its appearance in the first plateful. The butler was summoned to remove the dish. "It cannot be that the mem sahib found no napkin at the bottom," he hazarded, much distressed because of this unexplained disapproval, "for I myself placed there the largest one I could find."

Comets.

Some comets have shown puzzling eccentricities. One broke up into five small comets, which pursued parallel paths. The tail of a second showed kinks, as if it had been hit in the side by an invisible body. It is not unusual for comets to have two or more tails, and at least one has been observed which threw out lateral branches.

Roman Pottery.

The ancient Romans excelled in making pottery. They possessed regular muffle ovens and even a sort of producer gas oven.

Seaweed.

From seaweed when reduced to ashes are gained some of the most beneficent preparations in use today. Some of these are iodine, bromine, hydriodic acid, iodides of sodium, mercury, potassium, magnesium and calcium. From it are extracted coloring matters, volatile oil, and its ingredients are used in photography.

Colonies as Kingdoms.

Queen Elizabeth was commonly spoken of as queen of Virginia. Virginia and Carolina were kingdoms under the Stuarts. Massachusetts was recognized as a "sister kingdom" by Cromwell's parliament.

Own Your Own Mind.

Have you ever considered the possibility of doing this? Remember that living in a rented mind, furnished with opinions bought on the installment plan, never offers any inducement with it for the future. Not only this, but you are not saving up anything.

The advantages of owning your own mind will be apparent at a moment's thought.

In the first place, you come to take a personal interest, which you do not feel when it is owned by some one else. Then again the natural increase in value redounds to your own profit. You have no one to dictate to you as to the inside furnishings and decorations. Besides, it makes you more particular with regard to what you put into it. If you live in a rented mind you don't care much. You will drive nails in the walls and get generally careless about it. But when you own your own mind you are constantly going about picking it up. You take real pride in it.

Be it ever so humble, there is no place like a mind that you own yourself.—Life.

Length of Dreams.

Three physicians were discussing the matter of the length of dreams.

"One afternoon," said one of them, "I called to see a patient, and, much to my satisfaction, I found him sleeping soundly. I sat by his bed, felt of his pulse without disturbing him and waited for him to awaken. After a few minutes a junk dealer's cart with discordant ringing bells turned into the street, and as their first tones reached us my patient opened his eyes.

"'Doctor,' he said, 'I'm glad to see you and awfully glad that you woke me, for I have been tortured by a most distressing dream that must have lasted for several hours. I dreamed that I was sick, as I am, and that my boy came into the room with a string of most horribly sounding sleighbells and rang them in my ears, while I hadn't power to move or speak to him. I suffered tortures for what appeared to be an interminable time. I'm so glad you woke me.'

"The ringing of those bells for one second had caused all of that dream and just at the waking moment."

Tough Turkey.

Mark Twain, when he worked in Nevada on the Virginia City Enterprise inserted in the news a good many boarding house jokes.

In revenge the humorist's sensitive fellow boarders in Virginia City decided to put up a game on him. They enlisted the landlady's help, and at the Thanksgiving dinner at the boarding house Mark Twain by a dexterous piece of sleight of hand was served apparently direct from the fowl with a turkey leg of painted wood.

The humorist sawed away solemnly at the wooden leg for some time. Then he said to the landlady, with a smile:

"You've changed your poultry dealer, haven't you?"

"Why, no, Mr. Clemens," she replied. "What makes you think so?"

"This turkey," he answered, giving the wooden drumstick a little whack with his knife. "It's about the tenderest morsel I've struck in this house for some months."

A Modest Judge.

A certain prominent English jurist was transferred from the chancery court to the admiralty court rather unexpectedly. While conversant with English law to a surprising degree, this gentleman had spent little time in marine law and was rather dubious as to his ability to cope with the duties of his new office. His colleagues, in recognition of the occasion, gave him a dinner, after which he was called upon for an address. He made a long and serious speech, which embraced about everything from free trade to England's foreign policy. Then, pausing a moment, he glanced round the crowded room and said:

"Gentlemen, in closing I can think of no better words than the lines of Tennyson:

"And may there be no moaning of the bar
When I put out to sea."

To Munch a Viper.

Though the prescription seems to have disappeared from the pharmacopoeia of modern "beauty specialists," it was for centuries notorious that to feed on snake meat was the way to win perpetual youth; to cure goiter, again, or any other swelling, all that was necessary was to munch a viper, from the tail up, as it might be a stick of celery, while yet another snake, if eaten, conferred the power of understanding all the tongues of birds.

Costly Counsel.

"I can understand all you have to say on the subject in an hour's time," said the judge.

"Beg pardon, your honor," persisted the young lawyer, "but I shall consume at least five hours in my argument."

"Very well; have it your own way," said the judge, with resignation. "But it will take the prisoner about five years to tell why he employed you."—Harper's Weekly.

Inherited.

"Where did Phlyem get his propensity for ballooning?"

"I don't know, but his grandfather died in the air."

"Above the trees?"

"No; under one."—New Y

FARMER BUILDS RAILROAD

Doing Most of Work Himself on Line in Western Kansas.

In the hills of western Kansas in Hodgeman county one man is building a railroad, says a correspondent of the Topeka Capital. He is building it by himself literally, unless one counts the four mules and the scraper that are necessary in the making of the grade.

Rudolph Meyers, a native of Jefferson county, Kansas, has sought no bond issues, and the right of way he has secured thus far he has bought with his own money. For 18 months he has been working quietly on his roadbed, and in those 18 months every one who has asked him questions has received a nod of his head for his pains. Meyers will say nothing.

And the result of his noncommittal attitude has been that not alone is Jetmore, the county seat of Hodgeman county, talking in an excited way, but the entire Seventh and Eighth congressional districts are discussing the peculiar enterprise which one man is fostering.

This railroad which Meyers has started is planned to extend from Jetmore to Garden City, 54 miles. It will run almost due west and would afford a connection with ths Jetmore branch of the Santa Fe, which now extends from Larned to Jetmore. The people of Jetmore and the county around it always have sought a western connection with Garden City, which would afford another junction with the Santa Fe's main line. For 20 years men have been predicting that some day that line would be built; that it would have to be built.

In the middle '80s even the Santa Fe made a survey and laid out grade sticks, some of which are still in evidence along the grade being established by Meyers. But the Santa Fe gave up its plan years ago and all rights were relinquished by it. Meyers has been so confoundly silent that the people have never been able to get so much as an intimation from him. He has lived in a shack out a few miles from town, has worked every day and has attended strictly to his own business.

And now after 18 months Jetmore is waking. It finds that Meyers, the mysterious, has completed nearly two miles of his roadbed, and that he has established a roadbed on two of the roughest miles of the proposed route between Jetmore and Garden City; two miles that were filled with hills that went as high as 50 feet, which Meyers reduced to the levels, two miles that were interspersed here and there by ravines many feet deep, which Meyers filled after ceaseless work.

He has established a roadbed on what is practically the only route that can be followed if any one wishes to build a railroad from Jetmore to Garden City, and therefore if Meyers never completes his own road he will hold the necessary key for any one else who wants to undertake the task.

$2.50 SENT FREE

The Celebrated Specialist, Franklin Miles, M. D., LL. B., Will Give a $2.50 Improved Treatment Free.

Many Chronic and So-called "Incurable" Cases Cured After Others Failed.

There never was a better opportunity for persons suffering from diseases of the heart, nerves, liver, kidneys, stomach, or dropsy and rheumatism, to test free an Improved Special Treatment for these disorders. Dr. Miles is prominently known as a leading specialist in these diseases, and his liberal offer is certainly worthy of serious consideration.

His new system of Special Treatments is thoroughly scientific and immensely superior to the ordinary methods. They consist of several new remedies carefully prescribed to suit each individual case and are the final result of 30 years extensive research and remarkable success in treating this class of diseases. They include curative elixirs, tonic tablets, eliminating pills and usually a plaster. These treatments are three times as successful as those usually given.

"You cured me," writes Truman DeWeese, former Editor Chicago Times-Herald. Mrs. Anna S. Martz, Dayton, Ind., cured after 3 physicians failed. Mr. E. H. Chase, Andover, N. Y., after 12 failed. Mrs. Tobie G. Jenkins, Bastrop, Tex., cured after 20 failed. Mr. Chas Deaver, Hinton, W. Va., after 7 failed. Mr. B. F. Artz, Pataskala, O., after 9 failed. Mrs. Mary DeHart, Greenville, Pa., cured after 11 failed. Other remarkable testimonials from your state sent upon request.

As all afflicted readers may have new book, Examination Chart, Opinion, and a $2.50 Treatment, free, we would advise them to write at once. Describe your case. Address, Dr. Franklin Miles, Dept. G. 480 to 491 Main St., Elkhart, Ind.

A Safeguard To Children.

"Our two children of six and eight years have been since infancy subject to colds and croup. Fair Exchange, Yet a Robbery.

While Gustave Dore was at Ischl and wandering about the mountains he became much interested in a country wedding and sketched it on the spot. He put the sketch into a book in the pocket of his paletot and went back to the hotel to dinner. After dinner he looked for the sketch. It was gone. Angry at the theft, the artist called the landlord and made complaint, but no trace of the book was found. From Ischl Dore went to Vienna, and there he found a letter and a parcel awaiting him. The letter, which was anonymous, read thus:

"Sir, I stole your book at Ischl. The sketch was so charming that I could not resist the temptation of having it in my possession, and I knew very well you would never consent to sell it to me. But theft is neither my trade nor my habit, and I beg you to accept as a souvenir of my crime and my enthusiasm for your talent the walking stick which will reach you at the same time as this letter."

The cane was one with a massive gold head in which was set a gem of value.

The Clock's Annoying Habit.

Mrs. Benham had just seated herself to work at a bit of embroidery that required particular care and attention when there came a ring at the telephone. "I just know that's Mrs. Gummy," she said as she laid down her work and went to answer the call. "Whenever I am unusually busy and haven't any time to spare she rings me up and talks to me by the hour."

She was right. It was Mrs. Gummy, who was fully as talkative as ever. She began with a long story, and when fairly in the middle of it the clock on the wall of the room began to strike.

"Wait a moment," interposed Mrs. Benham. "I can't hear you until this noise stops."

"What made that noise?" asked Mrs. Gummy after it had ceased.

"It was only the clock,' answered the patient Mrs. Benham. "You know it always strikes once or twice when we get to talking."

The conversation did not last long after that.—Youth's Companion.

A Curious Trap.

A curious labyrinth in which elephants are captured alive is to be seen near Ayuthia, formerly the capital of Siam. The labyrinth is formed of a double row of immense tree trunks set firmly in the ground, the space between them gradually narrowing. Where it begins, at the edge of the forest, the opening of the labyrinth is more than a mile wide, but as it approaches Ayuthia it becomes so narrow that the elephants cannot turn around. Suspecting no danger, the wild elephant enters the broad opening at the forest end, lured on by a tame elephant. The gradual narrowing of the boundaries is not observed until the elephant finds himself in close quarters. Having reached the end of the labyrinth, the tame elephant is allowed to pass through a gate, while men lying in wait slip shackles over the feet of the captives. The sport is a dangerous one, for the enraged elephants sometimes crush the hunters under their feet.

Bull Baiting.

Although bull baiting was a cruel pastime, it was also a fulfilling of the law, for formerly no butcher was allowed to offer for sale the flesh of any bull that had not been baited. The goading of the animal in a fury was supposed to have some influence on the flesh. In a similar belief the flesh of a hunted hare was thought to be superior in flavor to that of one that had been shot, and a present of "a hunted hare" was considered to be a special compliment. In the records of the corporation of Leicester, England, the following order appears: "At a common hall, held on Thursday before St. Simon and St. Jude, 1467, 'no butcher to kill a bull till baited.'" At Winchester it was ordered (reign of Henry VIII.) "that from hensforth ther shal be no bulstake set before any mayor's dore to bayte any bull, but onlie at the bullringe within the saide cytie."

Gender of the Sword.

Among the many curious notions obtaining among the different races using the sword may be noted the gender of the weapon. In the north of Europe it was either masculine, as in Britain, or neuter, as in Germany, while in the south it was uniformly feminine. Its force and cruelty appealed to the northern mind. Its grace and elegance attracted the warriors of the sunny south. It typified to the one strength, to the other dignity.

What He Saved.

"Good!" shouted the friend of the bibliophile as the latter emerged from the burning house carrying a bundle of books. "Did you save your Shakespeares?"

"No," replied the bibliophile, combing a spark out of his whiskers; "I saved my Bacon."—Houston Post.

THE DEBUTANTE.

Charming Frocks She May Wear to Dinner and Dances.

Costliness need not be a factor of the debutante's gowns, but instead freshness and perfect neatness are far more essential. Her wardrobe should include at least six evening gowns. If she happens to be very popular and goes to five evening entertainments a week the six gowns will not take her very far unless continually freshened and made over, for the debutante evening gown must not be made of heavy materials. The lighter and daintier and more perishable it is the better, chiffons, tulles and laces being used to the exclusion almost of silk, satin or

PARTY CREATION IN PINK.

velvet. And if costly laces and chiffons are employed the effect ought still to be simple. Two crush dances often practically demolish a tulle gown.

Perhaps the hardest time of all for the mother of a debutante is when, the coming out party successfully accomplished, invitations begin to pour in for the debutante. At first these are easily managed, coming, as they do, mostly from close friends, but as the debutante goes to one and another affair, meeting many strangers not known to her parents, the invitations are not so easily managed and, left to herself, the girl would inevitably make decisions of which her mother would not approve. There will be a tempting invitation to a house party, an automobile party, a theater party, and so on from one and another person not on her mother's calling list, but whose daughter may have attended school with her. This is all right and proper enough for the sender of the invitation, and the debutante would be quite right to accept provided her mother likes to add the sender of the invitation to her visiting list; otherwise the invitation, no matter how alluring, must be regretted. But, to come back to the question of the debutante's evening frocks, the illustration shows a charming model in pink mousseline de soie with gray knot decorations as the principal trimming. It is simple and exquisitely dainty.

HEALTH AND BEAUTY.

After a trying day nothing is more restful to the head than a cloth saturated in toilet water and laid across the temples. A good toilet water can be made at home with lavender water, rosewater and acetic acid.

Bicarbonate of soda when taken before meals will reduce flesh. Take a small spoonful to a glass of water. Many physicians recommend soda, but the treatment must be persevered with and not taken for awhile and then dropped.

Many women have a wrong understanding of the bang, believing it is only for children and young girls. In this they are mistaken, as the bang softens features that are hard, conceals the little wrinkles about the temples and acts as a sort of veil to the heavy lines across the forehead. All women of mature appearance should wear the bang, but it must be treated artistically.

Since the days of Cleopatra rainwater has been considered the best of cosmetics for the complexion, and a walk in the rain is of more aid to the face than a quantity of medicines. Not only the contact with the fresh water, but also the dampness of the atmosphere, thoroughly cleanses the tissues, effacing from the skin all the wrinkles formed by heat or worry. Long naps and walks are also beneficial.

Sufferers from insomnia should avoid sweet desserts at night as well as tea, coffee and greasy foods. Whether it is better to retire with an empty stomach can be determined only by experiment in each individual case. One of the best ways, says the same authority, to draw the blood from the brain before retiring is to take a moderate swift walk. If there is still difficulty in getting to sleep, a tepid bath and a gentle rub will bring the blood from the brain to the surface of the body. If the cause of sleeplessness is susceptibility to sound, stuffing the ears with medicated cotton will be useful.

Wedding Ring on Right Hand.

In Denmark a widow is always known by the hand on which she wears her wedding ring. Instead of wearing both engagement and wedding rings on the same finger, as we do, Danish brides wear only one plain gold band on their left third finger, which is the wedding finger in that country. When the husband dies the widow changes her ring to her right third finger, and then everybody knows that she is a widow.

Glassware and Hardware.

On occasions of impending danger people sometimes do what seems to them most absurd at other moments. When the steamship America, which carried one of the Ziegler exploring expeditions to Franz Josef Land in 1903, was being crushed by ice the following winter it became necessary to abandon the ship in haste. Orders were given to unload upon the ice everything that would be of use in the long winter yet before the men. The work must be done with dispatch.

While the crew was passing the bags over the side of the ship the cook, who was of an excitable nature, suddenly appeared at the rail with a large bag, which he heaved over with all his strength. It struck the ice below with a resounding crash, causing one of the sailor's to exclaim:

"Hello, cook, what was that?"

"Oh, that is all right," he answered. "It was lamp chimneys and flatirons."

But it was hardly all right, for during the winter they were obliged to cut the bottoms out of pickle bottles and use them in place of chimneys that had been broken.

Doubtless True.

A teacher in a Birmingham school was endeavoring to explain the term "booking" as applied to our railway system, says London Tit-Bits.

"Now," he was saying, "can any of you tell me the name of the office at which railway tickets are sold?"

"The booking office," replied one of the lads.

"Right," responded the teacher.

At this moment his eye fell on a small boy at the end of the class who was evidently paying very little attention to what was said.

"Did you hear that, Spry?" he demanded.

"Wot, sir?" asked that youth innocently.

"As I thought, you were not listening. We will suppose your father decided to have a day's holiday and visit the seaside. What would he have to do before he could take his seat in the train?"

Without a moment's thought the youngster electrified his teacher by replying:

"Pawn his tools!"

Odd French English.

A correspondent has been studying English pronunciation in a French dictionary (Pierre Larousee, 1890) and picks out a few examples to show how much effort is necessary for a Frenchman to acquire a true articulation of English. They are all taken from a surprisingly long list of English phrases current in France. "Broken down" (as applied to a race horse) is "bro-k'n-daoun." "Dead heat" is rendered as "did-hith," which is ingenious, but hardly correct. "Al-laif" is not a bad attempt for "high life," although the aspirate is missing. "Self government" looks an even more imposing political ideal as "self gheuvernmentt," and the word "shocking" is quite applicable when rendered "chok-inn-que." The opening words of Hamlet's famous soliloquy have a decidedly foreign look. "Tou bi or nott tou bi, that is thi kouess-tcheunn."—Manchester Guardian.

Alluring Surroundings.

A young man who had just gone to Philadelphia to take employment in a business house was casting about for a suitable room for himself in Germantown when he chanced upon one in a fine house overlooking a cemetery.

He was a little doubtful about the terms and more than doubtful about the cemetery.

"Your rate is pretty high," he murmured hesitatingly to the landlady.

"But consider the cheerful view, sir," ventured the mistress of the house.

"Cheerful view!" exclaimed that applicant for lodgings. "Is that what you call a view that embraces a graveyard?"

"Why, certainly," was the response. "Just think how comfortin' and cheerin' it will be when you look out of your window and think you're not there!"—Cincinnati Commercial Tribune.

Arsenic.

Arsenic is mined in Japan, Italy, Portugal, Spain, Germany, England and, within a limited area, in the United States. Its uses are many. As a poison it has been known from very early times. The peasant women of Austria consume large quantities of it, having faith in its virtues as a beautifier, and the men of the same region are addicted to its use in the mistaken belief that it increases their bodily strength and endurance.

Noblesse Oblige.

"What are you staring at, Nellie?"

"Oh, please, ma'am, with your hair like that and your diamonds you do look so like Lady Plantaganet Gingham that I was own maid to! Are you any relation, ma'am?"

"No—at least no near relation. But you can have that pink silk waist of mine, Nellie!"—Life.

An Effort to Console.

"Yes," said Mrs. Flummerton, "my ancestors were among the country's first settlers."

"Well," answered Mrs. Cumrox consolingly, "the social and educational facilities in those days must have been rather crude, but I don't believe in heredity."—Washington Star.

Foolish Question.

"Some one stole every blessed stocking off our line."

"What are blessed stockings?"

"Those which are not darned, of course."—Exchange.

SIRES AND SONS.

Mayor Briemeyer of Detroit likes to talk German to his friends.

Major General Fred C. Ainsworth, adjutant general of the army, gets up at 4 o'clock and takes long walks.

Fred D. Countiss, the new president of the Chicago Stock Exchange, is one of the youngest presidents the organization ever had. He is only thirty-seven years old.

Dr. Jose Figueroa Alcorta, who succeeded to the presidency of the Argentine Republic on the death of President Manuel Quintana in 1906, is a lawyer. He still has three years of President Quintana's unexpired term to serve.

The house of lords contains a golfer who may be fairly regarded as its most distinguished as well as its most assiduous devotee of the game. This is Lord Wemyss, who, though he is nearly ninety-one, still plays three or four days a week.

Senator Hernando de Soto Money is a lawyer and not wealthy. He served in the Confederate army and has suffered for years from an injury received while on duty. He was named after the discoverer of the Mississippi river. He was born in the state of Mississippi, and his home is in Mississippi City.

Jacob Schiff of New York, the financier, has given $50,000 for the establishment of a training school for Jewish teachers. Mr. Schiff is a native of Frankfort-on-the-Main, noted for its production of famous financiers. He came to America in 1865 at the age of eighteen and has lived in New York ever since.

Captain Daniel D. Willard of South Portland, Me., who will be seventy-six years old in March, is the oldest shipmaster in active service on the Atlantic coast. He is six feet two inches tall and bears a strong resemblance to Abraham Lincoln. He has been sailing the schooner Nellie Sawyer for twenty-two years.

Tales of Cities.

Manchester, N. H., has thirty-one public watering troughs.

The city council of Cincinnati is planning a subway to connect the business section of the city with the outlying residential sections.

The Chinese city of Fuchau, which is about the size of St. Louis, gets all its milk through half a dozen "walking dairies"—that is, men who bring cows to be milked in front of customers' houses.

In the wall of a tenement house at Oak and Oliver streets, New York, are five bronze tablets. By these the passerby learns that on the site of the present building stood the tavern in which the evacuation papers were signed Nov. 25, 1783, the day on which the British army left this country.

College and School.

The schools of New York city are woefully overcrowded.

The board of trustees of the University of Pennsylvania has authorized the establishment of a bureau or institution of German-American research.

Woodrow Wilson, president of Princeton university, of which he is an alumnus, is only forty-eight. He was born in Virginia and practiced law one year in Atlanta, Ga.

Within the period since the trustees of Columbia university held their regular meeting, in June last, the sum of $4,281,562 has been received by the institution in gifts from various sources, chiefly in the form of bequests.

The Royal Box.

Queen Maud of Norway, King Edward's youngest daughter, shoots well and as a child practiced daily at a target.

The Grand Duke of Hesse, who recently wrote a successful five act play, is hailed by the German press as the latest recruit to the ranks of royal dramatists.

King Victor Emanuel is a scientific numismatist and collector of coins. His cabinet contains 60,000 coins, some most rare and almost priceless. The king will shortly publish a treatise on numismatics. It will run into several volumes and will be entitled "Corpus Minimorum Italicorum."

Law Points.

A loan of money is held in Long versus Lemoyne, 222 Pa. 311, 71 Atl. 211, 21 L. R. A. (N. S.), 474, not to be within the operation of a statute preventing a member of a municipal council from profiting by any contract for the sale or furnishing of any supplies or material to the municipality.

A master is held in Young versus Mason Stable company, 193 N. Y. 188, 86 N. E. 15, 21 L. R. A. (N. S.), 592, to perform his duty to his servant with respect to the inspection of a freight elevator used as an accessory to the general work of the establishment by having it performed regularly by professional experts.

Mr. E. A. Kelley, Belvidere, Ill. writes us: "I am an ex-engineer with 22 years active service to my credit. About three years ago my kidneys were so that I had to give up my engine. First I was troubled with severe aching pain over the hips. Then followed inflammation of the bladder, and specks appeared before my eyes. A sample of Foley's Kidney Pills that I tried, so benefited me that I bought more. I continued to take them until now I can safely testify they have made me a sound and well man." Sold by C. M. Case of Mistaken Identity.

Because his name happened to be identical with that of another man, Harry J. Cohen, the obliging clerk at Claster's Underselling Store, was technically under arrest for several hours last week. Harry's tastes incline stronly to automobiles and good looking girls. He never hitched up a hoss in his life. It was the irony of fate that he should be arrested and lodged in jail on suspicion of being the man wanted for failure to return a horse and buggy hired from W. R. Milliken, a Huntingdon County liveryman. The Bellefonte police were directed to pick up "Harry Cohen." Harry was accordingly locked up for the night. Quite naturally, he was the most indignant young man in town, especially when it cost him $5 for a lawyer to prove that there are lots of Cohens in the country. Liveryman Milliken, accompanied by Constable Port, arrived in town on Friday morning. One look at Cohen convinced them that they had the wrong man under arrest. Harry was quickly released. He says he would give a brand new $2 bill for a chance to punch the nose of the other Harry Cohen who caused him all the trouble.

Surprised Stormstown Pastor.

It was a pleasant surprise, indeed, tha the good people of Stormstown and vicinity gave their pastor, Rev. A. L. Frank, and family on Saturday, February 19, when about forty of them invaded the manse, bringing with them so many good things to replenish the larder and also useful articles for the home. After spending a most pleasant and profitable evening, socially, they departed for their respective homes, delighted with the success of their effort.

ONE WHO WAS THERE.

Mothers' Meeting Tomorrow.

A mothers' meeting will be held tomorrow (Friday) at 3:30 p. m in Petrikin Hall. The subject for discussion will be "The Child in School." Suicide at Osceola.

Andy Filyo, a Hungarian, employed in the brick yards near Osceola, committed suicide on Sunday morning, last. He hanged himself by a strap to a bedpost and when found was dead.

Centre County Deaths.

MRS. SAMUEL HOOVER.

Mrs. Samuel Hoover died suddenly at her home at Hannah Furnace early Monday morning, death being due to paralysis. She had been in poor health for some time but her condition was not at all serious and the news of her death was a shock to her many friends. She was between 75 and 76 years of age. Mrs. Hoover was a Christian woman, highly respected by a wide circle of friends and her death will be sincerely mourned by all who knew her. She is survived by three daughters and one son: Mrs. H. F. Chaney, of Port Matilda; Mrs D. O. Downing and Miss Sallie Hoover, who reside on the old homestead, at Hannah Furnace, and W. T. Hoover, the well known merchant at Port Matilda. Funeral services were held this morning at 8:30, and the remains were taken to Tyrone where interment was made in the Tyrone cemetery.

MRS. LUCINDA WAY.

Mrs. Lucinda Way, a former well known and highly esteemed resident of Altoona and mother of Mrs. Dr. S. L. McCarthy, of that city, died suddenly at 8 o'clock last Thursday night at her home, 3220 Haverford avenue, Philadelphia. Mrs. Way had been in delicate health for some time. Deceased was born in Centre county and was in her ninety-third year. She resided in Altoona for many years and only four years ago took up her residence in Philadelphia with her daughter, Miss Dora Way. She was during her residence in Altoona a member of the First Lutheran church, but after moving to Philadelphia became a member of the Church of the Disciples. In addition to the above named children she is survived by two sons, Dr. G. C. Way, of Altoona and John Way, of Ohio.

MRS. EVALINE RISHEL.

Mrs. Evaline Rishel died on Thursday last, at her late home, near Spring Mills, from pneumonia. Deceased was born in Brush Valley, 1837, and was 74 years old. She had resided near Spring Mills for more than 50 years, living by herself the greater part of this time. She was a woman with a very kindly disposition and was always ready to lend aid to others. She was a member of the Lutheran church and is survived by one son, J. W. Whitebother, of Altoona, and one sister, Mrs. Sarah Oliver, of Illinois. Interment was made on Monday at the George's Valley cemetery, Rev. W. B. Beeber, of Centre Hall, officiating.

MRS. BARBARA E. LAUBSCHER.

Mrs. Barbara Ellen Laubscher, widow of Jacob Laubscher, and daughter of Anthony Deubler, of Rebersburg, died at her late home at Swissvale on Friday night, last. She was aged 49 years and is survived by the following children: Mrs. Arthur McPherson, of Avis; Mrs. William Boyer, of Dunnstown; Mrs George Euglert, of Swissdale; Henry Laubscher, of Lock Haven, and George, Alvin, Edwin and Laura, at home. She is also survived by her father, three sisters and three brothers. Interment was made at Swissvale on Friday, with services at the Evangelical church.

MICHAEL HAYES.

Michael Hayes, for many years a foreman at the lime stone quarries in and about Bellefonte, died early Saturday morning, last, at the home of his niece, Mrs. Clayton Rider, at Coleville. While he had been in failing health for some time he was seriously ill but a few days, death being caused by acute Bright's disease. Funeral services were held on Monday morning at 10 o'clock, at St. John's Catholic church. Mr. Hayes was born in Ireland and was about 67 years of age. He is survived by the following children: John Hayes and Mrs. Glenn, of Renovo; Robert, of DuBois, and Mertie, of Renovo.

MRS ELLEN CAHILL.

Mrs. Ellen Cahill, whose death occurred at Osceola on Tuesday, last, was buried on Friday. Deceased was born in Ireland and was 92 years old. She is survived by the following children: Mrs. J. L. Reeve and James W. Cahill, of Osceola, and William Cahill, of Philadelphia. Two sisters also survive: Mrs. Catherine Keefe, of Osceola, and Mrs. Mary Watson, of Hokendaqua.

MRS. LINCOLN RYVER.

Mrs. Mary Ryver, wife of Lincoln Ryver, of Philipsburg, died on Wednesday of last week at her late home at that place. She had been ill several weeks. Deceased was the daughter of the late Elijah and Annie Reece and was aged 25 years, 4 months and 25 days. She is survived by her husband and an infant child, and also one brother and one sister. Interment was made on Friday, last, at Philipsburg.

MRS. MARY F. HOLT.

A sudden death was that on Saturday, last, of Mrs. Mary F. Holt, for many years a well known and highly esteemed resident of Philipsburg. She was a daughter of William Foresman, a lumberman and pioneer settler of Centre County, who later removed to Illinois. She was married to William Holt, for years prominently connected with lumbering and farming interests at Snow Shoe and who in 1878 was killed by the giving way of a trestle on the Snow Shoe railroad, while on his way to Bellefonte.

Educational Train Today.

This is the day the educational train will visit Bald Eagle, Port Matilda, Unionville, Milesburg, Howard, Mill Hall and Beech Creek. The train will stop fifty minutes at each place for lectures by State College professors on subjects of interest to farmers. The lectures are free.

The Stars and Stripes.

We were all asking, "How did the national flag originate"? Attention was called to a page in an English book of 1903, "Reminiscences of Lord Ronald Sutherland Gower." He tells of a visit to Little Brington, where is an old cottage in which lived the ancestors of George Washington. "At Great Brington, two miles away, is the church, where two plain slabs cover the bones of George Washington's ancestors. The oldest of these is that with an inscription to the memory of Lawrence Washington, deceased, in 1616, leaving behind him eight sons and nine daughters! Two of his sons migrated; from one of these George Washington descended. The other inscription is engraved on brass, beneath the Washington coat of arms. Here see the original of the American "Star Spangled Banner" and of the stripes; for on the coat of arms on this old brass appears three stars, with the bars or stripes beneath them. An interesting chapter might be written on the origin of the great flags of the world. That of the American Republic lies on the old floor of Brington church."

To Save Meat Bill.

Housekeepers who have found trouble in making expense accounts normal while meat prices have been soaring will welcome the Sunday North American for February 27, a part of which will be a cookbook made up from tested recipes arranged to cut table expenses in half.

This is the first cookbook ever compiled with a view to showing how to prepare the cheaper parts of the beef, which are quite as nutritious as the costlier ones.

This collection of recipes puts the housewife in a position to beat the high prices, please her family and keep her expenses normal in spite of the Beef Trust's quotations.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its states, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, action directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

The Williamsport papers last week noted the death of Dr. F. H. King, a former principal of the Howard schools, his death having occurred on Tuesday. He was a resident of Renovo at the time he taught school here. He later studied medicine and had been practising in Williamsport for the past two years. Dr. King was aged 44 years and is survived by a wife and one child.

Butter and eggs have taken a slight drop in price here, being quoted last week at 28 cents per pound for butter and the same price per dozen for eggs. Those who have to buy these necessary articles are hoping that the price will go even yet lower, so that they will be within the reach of the laboring man and yet profitable to the farmer.

The union missionary meeting announced to be held in the Methodist church last Thursday evening, was postponed on account of the illness of one of the speakers, Rev. Dr. J. Allison Platts.

The telephone service to be used in dispatching the business of the Bald Eagle Valley branch has been installed in the station and tower here, and the employes now have access to the long distance 'phones communicating with all the large cities.

Manager W. H. Long, of the electric light station, last week took measurements at the passenger station in order to make an estimate of the cost of wiring and furnishing the station with electric lights. It is quite probable that the company will adopt this modern system of lighting their station and grounds here.

Miss Ruth Williams gave a party to a number of her friends last Tuesday, at the home of her parents, Mr. and Mrs. Lewis Williams. The young folks had a royal good time while they indulged in many juvenile games and Mrs. Williams added much to their pleasure by serving delightful refreshments.

Insurance Agent H. E. Logue, of Lock Haven, was a business visitor in town on Monday.

Interesting services commemorative of Frances E. Willard were held in the Evangelical church Sunday afternoon by the local W. C. T. U. The program consisted of readings and short talks on her life and the cause she represented. There was also select music by members of the several church choirs, special selections by the members of the Loyal Temperance Legion, a young folks temperance society, and a well prepared paper by Mr. C. M. Muffly on the most important topics pertaining to the temperance question. The services were of a very interesting nature and could not fail to be helpful and uplifting to all those who attended. Members of other unions were also in attendance.

A sled load of young folks from the schools drove to Varnell last Friday evening, where they attended the evening session of the teachers' local institute.

On Monday evening a sled load of relatives from town drove to the home of Mr. and Mrs. Bower Schenck in Liberty township, where they enjoyed themselves very much. They took along a good supply of oysters and the things that go with them to make a good supper and these were prepared in a very appetizing manner and served up as a very delightful repast.

The general thaw on Monday put our streets in a bad condition and in many places the slush and water was shoe-mouth deep, making it very disagreeable under foot for those who had to be out of doors.

Spring Mills.

County Auditor Robert Musser spent Sunday at home

Professor Henneberger royally entertained his school by giving them a banquet at the Cave Hotel. The pleasure was somewhat marred on the return trip, owing to an upset. Misses Leoda Rishel, Estella Wolf and May Hassenplug were slightly injured.

The Knights of Golden Eagle of this place held their annual banquet at Penn Cave on Friday night. All thoroughly enjoyed themselves. A splendid supper was served.

Among those from a distance who attended the funeral of Evaline Rishel were her son, John Whitebother, of Altoona, and J. A. Decker and wife, of Pine Grove Mills.

Taking advantage of the fine sleighing, John Snyder and his son, of State College, enjoyed a drive to the County seat on Saturday morning.

James A. Decker was a Bellefonte visitor this week.

A dead deer was found South of Pine Grove by Walter Weaver and George Dunlap. The deer was partly eaten and evidently had been killed by dogs. It is pretty nearly time these dogs are killed.

A bunch of thirteen turkeys have been coming off the mountains on the D. N. Miller farm for food. With so much snow on the mountain it is supposed that the turkeys are forced into the open to find food.

Cards are out for a noon wedding at the E. S. Tressler home, at Rock Springs, today, the 24th., when their daughter, Miss Blanch, will be united in holy wedlock to Adam Cramer, of Pine Hall. Miss Moore, of Centre Hall, and Robert Tressler, a brother of the bride, will be the attendants. The ceremony will be performed by Rev. A. A. Black, after which an elaborate wedding feast will be served. Both the young folks are well and popularly known in their respective communities.

The masquerade ball and festival on Saturday evening was a splendid success. About $50 were realized. George Dunlap was attired in Uncle Sam's costume to perfection. Miss Claire Martz's costume was that of Pocahontus. Both fully merited the favorable comment they received and carried away the prize.

Last Friday evening a jolly load from Pine Hall took the Lutheran parsonage by storm and gave the good pastor, Mr. Shultz and his excellent wife a complete surprise. They took possession of the house and held it during the evening. They brought along an abundance of food and a most delightful time was had by all present.

On Saturday about 4 o'clock a lively party left State College for an evening's fun that they enjoyed along the way, landing at Adam Reish's at 7.30 in the evening completely surprising the Reish family. Of course, they had their own refreshments along and also some presents to remind Mrs. Reish of her thirty-ninth birthday anniversary. About one hundred friends met at Zion and went in a body to the disturbance. The good wife for once was fooled by her wily husband. She had frequently boasted that she could not be surprised, but this time was for a fact.

The Everharts are getting busy for the next few weeks, at least. On the 11th of March, J. H. will sell at public sale on the Oliver farm over 100 head of stock. On March 17th Ben Everhart will take unto himself a wife, Miss Jennie Reed. On the 22nd Miss Martha will be married to Edward Johnson. On 29th John will flit to Blair county. On the 30th Martha and her husband move to Bellwood, and on the 31st Mrs. Everhart will move to other rooms and Ben and his wife will move in and take charge of the Stewart farm, where they lived for over a quarter of a century.

Unionville.

Miss Elizabeth Brugar, who has been home for a few weeks, has left for Atlantic City, where she expects to spend the coming summer superintending a hotel. She will not, however, reach that place until about the first of March, as she intends stopping to visit friends in Johnstown, Harrisburg and Philadelphia.

Joe Brugar will go back to the hospital in Philadelphia, soon, to have some further treatment for his shoulder and arm.

James Pratt has been home from Princeton to see his parents and during his stay preached at Howard. He returned to Princeton on Monday.

Mrs. Mary Henchey is seriously ill with pneumonia. She has not been well for some time, but last week contracted this dread disease which has thoroughly prostrated her. Her friends are extremely anxious about her yet we sincerely hope for her recovery. Miss Annie Rich is here as nurse for her.

George Calhoun and family, of Pittsburg, have been spending sometime with friends here. They returned to Pittsburg last Monday.

Mrs. Alonza McEwen has been visiting friends and returned to her home on Monday.

The Quarterly Meeting held in the Friends Church, on last Saturday, Sunday and Monday, was quite interesting, though not largely attended. Delegates were expected from Clearfield and Bedford counties. However, noné was present from Clearfield County, owing to serious illness in different families. One is that of Reuben Underwood who formerly lived in this community. Many will learn with sorrow that his wife is not expected to live long. Ministers were present from Baltimore, namely Dr. O. Edward Janney and Seneca Brumell and wife, each of whom spoke much to the edification of those present. Among the visiting friends present were, Isaac Underwood and daughter, Mary, of Bellefonte; Robert Way, wife and daughter, Verna, and E. B. Way, R. Orlando Way and wife, S. D. Eves and sister, Mary, of Stormstown; Allen Blackburn and wife, of Bedford, and Annie Rich, of Clearfield. Six sessions were held in all during the three days. We trust that some good seed there sown may spring up and bear fruit in time to come.

Our young folks are still enjoying the sleighing, and go out in parties for the evenings.

Mrs. Susan Blair has been worse for a week or more past. She is being attended by Dr. Seibert, of Bellefonte.

Mrs. Benjamin Walk is suffering with a severe cold on her lungs.

The Henderson school, who were invited to attend the flag-raising at Dix School on Washington's Birthday, attended in a body, being taken there by the parents of the scholars in sleds. The pantomime "Columbia the Gem of the Ocean", rendered by five of the largest pupils and the teacher, and the "Motion Song" and "flag salute" by the boys were fine and reflected great credit on the school and teacher. We note with pleasure that this flag raised at Dix is the third one put up in Taylor township during the school term. The first one, at the Henderson school; the second, at the Bell Hollow school, and the third, at Dix. Best of all, the teacher and pupils bought the flags and feel proud of the fact. Let the good work go on.

Centre Hall.

Will Odenkirk and wife, of Glenn Iron, spent Sunday at the homes of Philip Meyer and Mrs. John Odenkirk. Will is the station agent at Glenn Iron and used to be a Centre Hall boy. His many friends were glad to see him.

MANY STEEL CARS

P. R. R.'s Equipment is Largest in the World.

What is probably the largest steel passenger car equipment owned by any one railroad in the world is that of the Pennsylvania Railroad which, with the cars just completed and those in course of construction, has 630 all-steel passenger cars. With this large number of steel cars, the Pennsylvania railroad is now to start the operation of all-steel passenger trains on some of its lines of densest traffic.

On August 12th, 1906, the Pennsylvania railroad announced that all future passenger equipment would be built of steel; not only steel frame, but steel and non-collapsible in every particular. In planning the cars and establishing the standards, which are now copied in all Pennsylvania passenger cars, no expense has been spared by the company to build a coach which should provide the greatest possible strength, a steel framing which could not be affected by fire, an inside lining which should be absolutely unburnable, and, at the same time, one that would not conduct heat or sound.

The Pennsylvania railroad in November, 1906, ordered 100 all-steel passenger cars. Since that time additional orders have been placed and there are now in service on the company's lines 245 coaches, 10 dining cars, 21 combination passenger and baggage cars, 29 baggage cars, 18 postal cars and one company car; a total of 324 cars. In course of construction there are 140 coaches, 34 dining cars, 48 combination passenger and baggage cars, 4 baggage cars, 42 postal cars, 27 mail storage cars and 11 baggage and mail cars.

The Pullman company, at the instance of the Pennsylvania railroad, has for the past four years been at work designing all steel parlor and sleeping cars. Some 500 such cars are shortly to be completed and placed in service on the Pennsylvania railroad.

With the all-steel passenger equipment now in service or on order, and some 250 steel cars to be ordered on the 1910 passenger equipment program, the Pennsylvania railroad will, in a short time, have in service about 900 of its own steel passenger cars, and 500 steel Pullman cars.

HAPPY WOMEN

Plenty of Them in Bellefonte and Good Reason for it.

Wouldn't any woman be happy.
After years of backache suffering.
Days of misery, nights of unrest,
The distress of urinary troubles,
She finds relief and cure.
No reason why any Bellefonte reader
Should suffer in the face of evidence like this:

Mrs. B. F. Deitrich, 391 E. Bishop Street, Bellefonte, Pa., says: "I know that Doan's Kidney Pills are a good kidney medicine and I do not hesitate one moment in confirming the public statement I gave in their praise in October 1907. A member of my family complained a great deal of backache and headaches and I had heard so much Doan's Kidney Pills that I procured a supply at Green's Pharmacy Co. Their use effected a complete cure and also strengthened the kidneys. The benefit received has been lasting and I have thus been convinced that Doan's Kidney Pills act just as represented."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Chinese Laws.

In lemon colored silk a Chinese diplomat talked about Chinese laws.

"Some of our laws, you know, are very stimulating," he said. "For example, Chi owed money to a money lender. Chi would not pay, and the money lender hanged himself on Chi's doorpost. Chi was condemned to death. You see, he was really responsible for the money lender's death.

"A son able to support his parents is imprisoned for life if he won't do so. A son unable to support them is imprisoned for three years, as we hold—and quite rightly—that there must be something wrong with a young man who can't support his parents.

"Our police are excellent, thanks to the stimulus of our law. When a crime is committed a sleuth is put upon the case and given, say, thirty days to land the criminal. If the sleuth fails he himself pays the penalty of the crime, less two degrees. That, too, is a just and stimulating law, for if the police can neither prevent nor punish crime then they should be themselves punished for their rank incapacity."—New York Press.

Superstitious Remedies.

For whooping cough a cooked dormouse is good. In the eighteenth century this remedy was employed in Scotland. Here is another medicament for the same complaint: "Watercress is a very good thing, sir, with a little bit of that brown sugar what you uses to put on to bacon and some honey mixed with it. And I'll tell you what's a good thing for croup but a riesty bacon fat tried down and afore it resolves add some pepper and vinegar. It opens the pipes of the lungs, d'ye see." And if you are adventurous you may try this for "phlegm on to the chest:" Catch a "dear little dotty frog" and tie a bit of string to one of its back legs. Then you "keep on letting it go down your throat and pulling it up again." The narrator of this added to T. W. Thompson, who sets down these stories: "It's the truth, young fellow, and it cleared the phlegm out of his throat bootiful, but we wouldn't do such a thing as that. —London Chronicle.

Boomerang Kinks.

There are a good many "kinks" to be learned to throw the boomerang skillfully. One is always to throw against the wind if you want it to come back to you. It is a miniature aeroplane, for it literally sails against the wind and is borne upward and onward by the breeze. If the player wants to make a long distance straightaway record he can throw with the wind, but he must take care to select a boomerang which is heavy—so heavy that it will not be too much affected by the air currents. By pointing the boomerang at a certain angle he can make it soar aloft in circles like a hawk until it may be as high as 100 feet above the earth. As in golf playing, it is not so much mere strength that makes a long thrower, but the skill in aiming, the direction and in boomerang throwing the way in which advantage may be taken of the air currents.—St. Nicholas.

The Value of His Time.

Young physicians in the smaller towns have an idea that appearing very busy will help them greatly in starting a practice. The following was told by an ex-senator, Dr. Godfrey Hunter of Kentucky. Dr. Hunter had a call the afternoon following the hanging out of his "shingle" and started through town in his buggy at terrific speed. A policeman stopped the enterprising physician.

"Doctor," he said, "it is against the city ordinance to drive at the speed you are going. You must accompany me to the judge and pay your fine."

"What is the fine?" inquired the doctor.

"Five dollars."

The doctor's hand flew to his pocket. "Here's $10. I have to come back just as fast as I am going."—Success Magazine.

Fixed Stars.

There are no fixed stars. When we look up at the stars they appear to be very still and peaceful, but astronomers know that such is not the case, but that each one is moving, some with incredible speed, invisible to the unaided eye, yet visible to the instruments at their disposal. Our sun, for instance, which is nothing more or less than one of the "stars" supposed to be "fixed," is moving along, with the entire solar system, toward a point in the constellation Hercules. In nature, from the most insignificant germ to the largest world, everything is in perpetual motion.

The Maid's Chance.

"Do you ever lose that umbrella of yours?" asked the maiden.

"No; I don't," replied the man sternly. "The person who takes that umbrella will have to take me."

"Do I understand that to be a proposal of marriage or a threat?" inquired the miss sweetly.—Philadelphia Inquirer.

The Woman Question.

Little Willie—Say, paw, what is the "woman question?" Pa—It's numerous, my son. For example: What shall I wear? How does my hair look in the back? Is my hat on straight? etc. —Exchange.

Up and Down.

Algernon Arduppe—Can't you make me any better rate for room and board than what you advertise—$5 up? Mrs. Hamand—Yes. In your case it will be $5 down.—Chicago Union.

Knowledge is proud that he has earned so much. Wisdom is humble that he knows no more.—Cowper.

A WOMAN'S TACT.

The Actress Spoiled a Scene, but Soothed the Angry Star.

There is a pretty story of Modjeska and a new leading woman who was to play the part of Elizabeth in Schiller's dreary play, "Mary Stuart."

The new leading woman, who was to assume the part of the red haired sovereign, was a beautiful young person whose acting experience had been limited to a few seasons in modern society plays. On the night of the first performance, in the most important scene of the drama, where the captive Mary confronts Elizabeth in Fotheringay park, all was not well. The new leading woman, wearing a wig for the first time in her career and looking uncomfortable in the high Elizabethan ruff, was ill at ease in the beginning, and, losing one of the chief words and thereby the meter from her opening lines, she began to flounder and soon "dried up" completely.

This left Schiller's unhappy Mary standing in the center of the stage waiting to be adequately insulted. But Elizabeth's mind was a blank, madam could see that, and, jumping to her last speech, the curtain was brought down. Everybody on the stage was distressed. But instantly the beautiful young woman, disguised as the irate Elizabeth, rushed to the star's side and said:

"Dear madam, I am so sorry, but you know you do look so lovable in this part it was impossible for me to say those terrible things to you!"

For a second there was a mixed expression on Modjeska's face, and then she forgivingly patted the speaker's cheek and walked away.—Metropolitan Magazine.

THE STAGE DRINK.

Some Sarcastic Comments Upon Its Terrific Potency.

What we have always noticed about the stage drink is its terrific potency. That there are other points of interest in this thing we do not deny, and we are inclined to agree with a writer in one of the weekly papers who says that "our actors, even the best and most experienced of them, haven't the faintest notion of how to drink naturally and with the air of men who are enjoying the process." And we have frequently noted that curious unspillable quality in the musical comedy drink. In this particular type of potation, which is set to music and which we may call the gay drink, the careless gestures of the flagon holders, who do not actually drink until they have waved the goblet upside down, have been known to make strong and thirsty galleryites burst into tears, commingled with reproaches. When falsely accused Frederick suffers a momentary attack of depression and decides to set out for territories exclusively canine he pours into a small liquor glass a little very pale brandy and, with a desperate cry of frenzy and despair, drinks it at one go. Sometimes it is half a glass of noncorporeal claret. But the result is the same. Falsely accused Frederick instantly starts his Apache dance with the grand pianoforte, and friends who believed in him, entering at that moment, say, "Good heavens, he's drunk!" The drink potent. It cannot always be a case of weakness of head.—London Globe.

No Beggars In Copenhagen.

Copenhagen is a city of 500,000 inhabitants. During a week's stay I have seen no seller of matches or boot laces, no gutter merchant, no blind or other afflicted persons about the streets asking for alms—not one single sign of distress due to poverty. I have explored the artisans' quarters by day and late at night. There is not a single spot in the whole of Copenhagen that could be compared even remotely to the slums in our large towns. There are no unemployed hanging about the street corners, no unkempt women standing idly at the doors, no ragged and dirty children playing in the gutter. There are no dirty houses, with dirty or broken windows, mended with bits of paper, and a ragged apron or a torn bedcloth doing duty for a curtain.—Denmark Letter in London Express.

An Ancient Greek Relic.

As a memorial of their victory in their final and desperate struggle at Palatea to hurl back the invading east the ancient Greeks made a tripod from the golden cups of the Persians' table and the bronze of their soldiers' armor. It bore on its sides the names of every city whose soldiers fought and fell in the supreme moment of a nation's life. That tripod still exists at Constantinople, a national relic which has endured longer than the states whose deeds it consecrated.

The Seventh Son.

"Yes," said the despondent man, "I was a seventh son."

"And didn't it bring you luck?" asked the superstitious one.

"Well, if being obliged to wear the castoff clothes of six other brothers is luck it did," replied the despondent man.—Philadelphia Record.

The Dear Friends.

Miss Thin—Don't you think my new dress is just exquisite? Fannie—Oh, lovely! I think that dressmaker of yours could make a clothes prop look graceful.

His Chance.

Little Boy—I want a dose of castor oil. Druggist—Do you want the kind you can't taste? Little Boy (anxious to get even)—No, sir; it's for mother.

Silence is one of the hardest arguments to refute.—Billings.

Out of Court.

"Good morning," said the lawyer as the lady entered his office. "I suppose you want to know how your divorce suit is getting along?"

"No; I want to call it off," responded the visitor. "I couldn't use a divorce just now."

"But you have such a clear case!"

"No matter. Nothing doing. The man I had intended to marry failed to get his divorce and the woman my husband wants to marry has just got hers. I don't propose to be left in the air. See?"

Thus the court was saved the trouble of impounding more testimony.—Philadelphia Ledger.

FOLLOWED BY PANTHER

Potter County Woodsman Has Thrilling Experience.

Notwithstanding the declaration of the State game authorities that the panther is extinct in Pennsylvania, the experience of Frederick Mahl, an old hunter, butcher and woodsman, one night the past week, indicates that the Kettle Creek region of Potter county has in it at least one of the dreaded animals.

Mahl is 73 years of age and when he came into Potter county as a boy of seven with his parents panthers were so common that Mahl is regarded as an authority on the "varmints," hence his announcement that he was overtaken by a real "painter" has aroused the keenest interest.

Mahl had spent the day overseeing a hog butchering at a farmer's several miles down the Coudersport pike, and at 8 o'clock that evening, when he started home, the farmer's wife fixed a generous basket of savory panhaus, spare-ribs and flitch, the smell of which doubtless permeated the night air as he trudged along over the frozen road.

Because of the almost unprecedented season of deep snow that has prevailed since before Christmas, all sorts of animals have been driven to hard staits for food, and wild cats, catamounts, foxes and skunks have been seen nightly along the beaten paths. But when a shriek almost as plaintive as that of a woman in distress rent the air within a rod of him, Mahl felt a cold shiver trickle down his backbone.

He stopped, listened, then called loudly lest the sound might have been made by a human being. But there was no reply, except the sound of the breaking of twigs in the bushes by the roadside, and then a dead silence.

Mahl started as fast as he could walk, and had gone a half-mile or more when an awful scream, half-demoniacal, half-sad, was utteted, this time slightly behind him, but still from the thicket. This well-known trait of the panther of nagging his intended victim for miles before making the attack was fully appreciated by Mahl and the fact that he yet had a full mile of woods to traverse before emerging at the edge of his own fields aroused no little fear of what might happen.

While he stood in the middle of the road endeavoring to catch a glimpse of the animal, the latter suddenly emerged, not a half-rod away, and stalked out into the road, where it stood.

Mahl's fighting blood was up. He put his old "stunt" to the test, jumped toward the beast as though to attack, at the same time uttering as loud a cry of alarm as he could. The trick worked.

The beast was so frightened by the sudden turn in affairs that it bounded up an embankment and Mahl heard nothing more of it.

Next day an examination of the snow was made and tracks almost as large as those of a bear were found. They were followed nearly a mile until they turned into the deep ravine and out upon the smooth ice of Kettle Creek and no longer were discernible.

Mahl is certain that the "varmint" was a panther. It would take a monster catamount to have made such big tracks, and catamounts are not known to cry when following their intended prey. An effort will be made to find and kill the big beast, whatever it may be.

Why Hindoos Don't Go Mad.

Why are there so few lunatic asylums and so small a proportion of insane persons in India? That is a question which many a traveler has wonderingly asked. The Hindoos regulate their lives entirely in accordance with their religion—that is, their working, eating, sleeping, as well as what we usually regard as our "life" in the religious sense of the word. Everything is arranged for them, and they follow the rules now just as they did 2,000 years ago. This constant observance of the same rules for twenty centuries has molded the brains of the race into one shape, as it were, and, although their rites are queer enough, yet there is but an occasional example of that striking deviation from the common which is called insanity in countries inhabited by the white race. They are fatalists too. With them it is a case of "what is to be will be" carried to the extreme. This has in time given them the power to take all things calmly and so freed them from the anxiety that drives so many white men into the lunatic asylums.

Thought It Was the Monkey's.

A diamond necklace was possessed by Mme. Geoffrey de St. Hilare, the wife of the famous French naturalist. It was one of the chiefest of her "contentments," as Hindoo women aptly term their jewels. One day madame missed her necklace. There was a terrible turmoil in the house, and all the servants down to the foolish fat scullion were suspected, but in turn proved their innocence. At last it was remembered that M. de St. Hilaire had a pet monkey, and on a search being made in the "glory hole" of the quadrumane the precious bauble was discovered hidden away with a white satin shoe, several cigar ends, a pencil case and a decomposed apple. The renowned naturalist calmly observed that he had frequently seen the monkey playing with the necklace. "Why did you not take it from him?" indignantly asked his spouse. "I thought it belonged to him," replied M. de St. Hilaire. He evidently thought there was nothing unnatural in an ape possessing a diamond necklace as his personal property.

The Monasteries of Tibet.

Every Tibetan family is compelled to devote its firstborn male child to a monastic life. Soon after his birth the child is taken to a Buddhist monastery to be brought up and trained in priestly mysteries. At about the age of eight he joins one of the caravans which travel to Lassa. There he is attached to one of the local monasteries, where he remains as a novice until he is fifteen, learning to read the sacred books and perform the religious rites of his faith. The firstborn son, being thus sent into the church, as we should say in this country, the second becomes the head of the family and marries. Unlike some other semi-civilized races, these young Tibetans have the right of choosing their own wives. Nor can a Tibetan girl be married off by her parents without her own consent. The curious custom in regard to the eldest sons results of course, in nearly every Tibetan family acquiring the odor of sanctity, numbering a monk among its members—London Telegraph.

Slow but Inexorable Justice.

In October, 1900, Pietro Giaconi and Marie Bonelli were tried at Rome on a charge of sextuple murder by poisoning committed thirty-one years before. In England Eugene Aram was hanged for the murder of Clarke fourteen years after the offense. A man named Horne was executed for the murder of his child in the eighteenth century no less than thirty-five years after the offense. There is also the well known case of Governor Wall, who was executed in 1802 for a murder committed in 1782. Sherward was hanged at Norwich for the murder of his wife after a lapse of twenty years. But Sir Fitzjames Stephens recalls what is the most remarkable case of all. He prosecuted as counsel for the crown in 1863 a man who was charged with stealing a leaf from a parish register sixty years before—that is, in 1803. In this case the prisoner was acquitted.—London Standard.

Prohibited Coffee Houses.

So many coffee houses sprang into existence in England during the reign of Charles II. that he, entertaining a belief that many political intrigues had their beginning in those places, issued an edict ordering them to be closed. In this proclamation the following words occurred: "The retailing of coffee or tea might be an innocent trade, but it was said to nourish sedition, spread lies and scandalize great men. It might also be a common nuisance."

Conceited.

Phyllis—Harry is the most conceited man I ever met. Maud—What makes you think so? Phyllis—Why, he first asserts that I am the most adorable woman in the world, the most beautiful, intellectual and in every respect a paragon, and then he wants me to marry him!

Life.

It has been said that life is made up of three things—heredity, environment and the will. If the heredity and environment of the child are what they should be the will will choose the right and do it.

Couldn't Help It.

Mr. Biggs—You must think me a blamed fool. Mrs. Biggs (kindly)—No, I don't think anybody ever blamed you.—Boston Transcript.

Men of loftier mind manifest themselves in their equitable dealings, small minded men in their going after gain.—Confucius.

OUR POOR LITTLE EARTH.

A Mere Speck Compared With Some of the Monster Suns.

The main facts of astronomy are highly interesting. It is only dry text books that have made us turn away from them. Read a good popular astronomy and you will gain a dim, remote idea of infinity and eternity. Sometimes you think you see a big star, but you do not. You merely see the light from it which has been 2,500 years in reaching us.

Almost everybody knows that our earth is a third rate planet in our solar system. Jupiter would scarcely condescend to notice us. But they do not know that our sun itself sits below the salt. It would not be admitted to a congregation of important heavenly bodies. Canopus, the largest star that we see, is 10,000 times the size of our sun, and our solar center is hopelessly outclassed by Aldebaran, Rigel, Sirius, Betelguese and countless others.

Mark Twain put this fact very well in one of his stories, "Captain Stormfield's Visit to Heaven." When the captain arrived and announced that he was from the earth the recording angels could not remember ever having heard of such a place before. One finally recalled that it was a poor little planet belonging to a poor little solar system away down in a dark corner of the heavens.—New York World.

A BRIGHT IDEA.

Unusual Sagacity That Was Lauded by the Professor.

That the proverbial absentminded professor is sometimes ably abetted by his wife is illustrated by a story told of Professor Bunsen. One evening about the usual hour for retiring he took it into his head to run over to the club just as he and madam were returning from an evening call.

"But," said the lady, "I must have the front door locked before I retire."

This emergency staggered the professor, and as he looked bewildered at his wife the lady, seized with an inspiration, continued:

"I'll go in and lock the door and throw you the key from the window."

This program was carried out, and when he reached the club the professor related the incident to a friend as evidence of his wife's unusual sagacity.

The friend greeted the story with a roar of laughter.

"And why, my dear professor," he said, "did you not simply admit your wife, lock the door from the outside and come away?"

"True," ejaculated the learned man of science, "we never thought of that."

The climax of the incident was reached an hour later when, returning home, the professor discovered that the lady in her excitement had thrown out the wrong key.

How They Got Out.

Uncle Ephraim had two hogs, which he kept in a pen at the rear end of his little lot. They were of the "razor-back" variety, and, although they were fed bountifully with kitchen waste, it seemed impossible to put any fat on their attenuated frames. One morning when he went out to feed them they were not there. They had disappeared, leaving no clew to the manner in which they had made their escape.

"What's the matter, Uncle Eph?" inquired a neighbor, noticing the deep dejection with which the old man was looking down into the empty pen.

"My hawgs is done gone, sah," he answered.

"Stolen?"

"No, sah; I don't see no signs dat anybody tuck 'em."

"Did they climb out over the top?"

"No; dey couldn't 'a' done dat."

"How do you think they got away?"

"Well, sah," said Uncle Ephraim, 'my 'pinion is dat dem hawgs kind o' raised deirselves up on aidge an' crope through a crack."—Youth's Companion.

Wonderful Memories.

We are told that Pascal never forgot anything he had seen, heard or thought. Avicenna could repeat by rote the entire Koran when he was ten years old, and Francis Suarez had the whole of St. Augustine in his memory. In three weeks Scaliger, the famous scholar, committed to memory every line of the "Iliad" and the "Odyssey." Another scholar, Justus Lipsius, offered to repeat the "Histories" of Tacitus without a mistake on forfeit of his life.

Writing For Money.

Fond Father—Yes, my boy at the varsity has written several articles for the magazines.

Friend—But he's not a professional writer, surely?

"What do you mean by 'professional?'"

"Why, he doesn't write for money?"

"Doesn't he? You ought to see some of his letters to me!"—Exchange.

Possibly True.

Mamma (to a friend who is lunching with her)—I don't know why it is, but I always eat more when we have company than when we're alone. Tommy (helping himself to the third piece of cake)—I know why it is; 'cause we have better things to eat.—Brooklyn Life.

Bind together your spare hours by the cords of some definite purpose.—William M. Taylor.

The Mullet In Gulf Waters.

The mullet has always attracted a goodly share of attention. His fame is not circumscribed by the boundaries of the gulf. Whether the visitor be from the Atlantic or the Pacific coast or from the shores of the Mediterranean or the Baltic, he wants to see, examine and feast on the mullet.

He is the best known fish that swims. Some have a prejudice against him; but, like all feelings of this nature, it rests on an unsubstantial foundation. It cannot bear investigation, for the mullet plays a greater part in appeasing the craving for sea foods than any fish that inhabits the waters of the gulf. He is here in summer and winter, in fall and in spring. When the fisherman contemplates his plight, when luck is against him and a feeling of depression creeps over him, the mullet, always ready to give him a helping hand, rushes into his seine and contributes to his fortune and to the gastronomic pleasure of the thousands of people to whom they are shipped. He is a regular standby. In prosperity and in adversity he is always here in abundance.—Pascagoula Chronicle.

Helping Him Out.

He was well groomed, sober, evidently intelligent, but he looked worried as he approached a policeman on Broadway, near Long Acre square.

"Officer, I know my name and all that sort of thing," said he, "but I don't know where I live. What'll I do about it?"

"Advertise," said the bluecoat with a stony stare. "What are you giving me?"

"Honest," continued the worried one, "I'm a stranger in New York. Got here this morning. Had the address of a boarding house on a slip of paper a friend gave me. Went there, engaged board, left my trunk and then went out on business. Now I've lost the strip of paper somehow, and I've forgotten the street and number. What'll I do?"

"Advertise," repeated the bluecoat, but less bluntly. "Then go to a hotel and wait for an answer. Another way is to write to the friend who gave you the address."

"Thank you," said the lost one gratefully.—New York Globe.

Life's Day.

The time that has elapsed since the first appearance of life on earth has been variously estimated at 100,000,000 to 200,000,000 years. To tax our powers of comprehension as little as possible Dr. H. Schmidt of Jena has taken the shortest estimate and has tried to make understandable the five great evolutionary periods through which life has passed by comparing them with a day of twenty-four hours. This is the result: The archeozoic period (52,000,000 years) is represented by 12 hours 30 minutes; paleozoic (34,000,000 years), 8 hours 7 minutes; mesozoic (11,000,000 years), 2 hours 38 minutes; cenozoic (3,000,000 years), 43 minutes; anthropozoic (100,000 years), 2 minutes. If the last period, the age of man, be compared in its subdivisions by the same scale it is found that the "historic" portion covers only 5 seconds, and 2 seconds are sufficient for the Christian era. It seems incredible, but the evidence is convincing that this does not exaggerate the time relations of our written records with the records of the rocks.

An East Indian Crime.

The occidental reader who shrugs his shoulders deploringly over the evils of Indian caste has little conception of what suffering the custom involves. Its tragedies extend even to the humble, commonplace matters of everyday life. A little incident witnessed by Prince Bojidar Karageorgevitch and chronicled in his "Enchanted India" needs no comment.

Stones and flying sticks were thrown at a little pariah girl whose shadow as she passed defiled the food of a Brahman.

He merely threw away the rice, which the dogs soon finished. But the bystanders who witnessed the girl's insolence in going so near a holy man—she, so base and unworthy—flew at the unhappy creature, who ran away screaming and dropping the load of wood she was carrying on her back.

Meat on a Spit.

It was the custom in mediaeval times to serve roast meat on a spit and to pass it round the table for each guest to cut off what he liked. In France one still finds chicken livers and bacon served on small spits.

It is probable that many people continued to prefer fingers to table utensils even after these were perfected and in general use, for knives were certainly invented at the period when Charles XII. chose to butter his bread with his royal thumb.

Wanted One Saved.

"My task in life," said the minister complacently, "consists in saving young men."

"Ah," replied the maiden, with a soulful longing, "save a good one for me, won't you?"

Irish Moss.

The seaweed known as Irish moss is used to some extent as a food by the peasantry along the coasts; also as a jelly for invalids and as a stiffening for calico in the printing process.

Grapes and Peaches.

The grape has more sugar in it than any other fruit, nearly fifteen parts in a hundred being sugar. The peach has least, only 1½ per cent.

Turkish Methods.

In Turkey nothing can be done without a bribe, but with a bribe, if it be only big enough, anything can be done, except, perhaps, the publication of correct news in a Turkish paper.

Wings of a Gnat.

The wings of a gnat vibrate at the rate of 15,000 times a second, this observation having been recorded through the use of an ingenious musical instrument.

An Old Time Winter.

It was so cold in New York part of the winter of 1779 that residents in the vicinity were compelled to cut down the tall trees that stood at what is now the head of Wall street to make kindling wood.

A Queer Cure.

At Loch Carron, Scotland, a certain cure for erysipelas is to cut off half of the ear of a cat and let the blood from either half drop on the inflamed parts.

Poisonous Snakes.

There are only eight poisonous snakes in America, and the proportion of poisonous snakes everywhere, except in Australia, is one in four. In Australia, however, the proportion is reversed, and three-fourths of the snakes found in that country are poisonous.

Convict Gardeners.

Instead of being put to ordinary jail tasks, long sentence prisoners at Hobart, Tasmania, are employed in the local botanical gardens.

A Plague of Sand.

Sand is the curse of Portuguese East Africa. It blocks the rivers and harbors and stretches in a vast sea toward the interior, effectually cutting off the coast towns from the highlands. Besides, it makes the problem of transportation the bugbear of the planter.

The Word "Mile."

The word "mile" is derived from the Latin "mille," a thousand. A thousand paces of a marching soldier made the old Roman mile.

The Stormy Petrel.

A bird of immense wing power is the tiny stormy petrel, the smallest webfooted bird known. It belongs to every sea, and, although so seeming frail, it breasts the utmost fury of the storm, skimming with incredible velocity the trough of the waves and gliding rapidly over their snowy crests. Petrels have been observed 2,000 miles from nearest land.

A Pauper Prince.

In a guidebook of Venice, compiled for strangers, is this notice: "When visiting this palace strangers should show themselves especially generous in their tips, as the prince who occupies this palace has no other means of support than to share in the money given to his domestics."

Washing the Capitol's Face.

The United States capitol receives its annual bath a short time before congress convenes, the toilet articles used consisting of about 2,500 feet of hose in the expert hands of one company of the fire department. Powerful streams of water at high pressure remove dust, spider webs, insects of all kinds, birds' nests and other foreign substances from the many crevices.

Honor In Wall Street.

One would hardly consider the New York Stock Exchange exactly in the light of "a communion of saints." Indeed, to judge by much that appears in the daily papers and the muck raking magazines, this might be the last place to look for the very soul and spirit of integrity. But there it is "in the midst of them." Between members of that marble mansion of trade in securities on New York's famous Broad street no paper writing passes certifying to the binding obligation of a transaction. In the very fiercest rush and maddest vortex of the wild corner a word, a nod, the merest sign, amply suffices. Whatever it may lead to—irreparable loss, ruin, bankruptcy, no matter—the deal is closed. I am not professing to be an apologist for whatever crimes may be committed in the name of honor. I simply record the fact, to be easily verified, that the dealings on that exchange are "on honor." The Corinthian fairness of its pillared and entablatured front is not shamed by the constant and consistent uprightness of the traffic within.—Christian Register.

A Tragedy In Writing.

Illegible handwriting, which has given rise to so many comedies, led to a tragedy in the case of Bacher, a musical enthusiast of the last century who devoted several years to the composition of a history of Viennese music. His task finished, he submitted the manuscript to the Austrian imperial academy, which he had been led to believe would defray the cost of its publication. After three months his manuscript was returned. Despite their best efforts the members had been unable to decipher it. Bacher then endeavored to have his work copied, but every professional copyist who undertook the task had to confess himself baffled. He thereupon attempted dictating the work, only to find that even he could not decipher it, and, heartbroken at the discovery that his years of toil had proved fruitless, he attempted suicide and finished his days in a lunatic asylum.

Her Cab.

Mary Ann of Lancaster Gate, basement, was having a week off and had arrived back at her little native village in all her metropolitan paint and feathers.

It was a very little native village, and Mary Ann, after her many months' service in town, didn't think so very much of it. Even James, the station porter and her old sweetheart, seemed hopelessly insignificant, and instead of staggering him with the kiss that he expected she looked him up and down, comparing him with a certain gentleman whose acquaintance she had recently made and who wore plush breeches and silk stockings.

"Porter," she said grandly, "do you know if there is a cab here to convey me and my luggage home?"

"Well, I don't know about a cab," responded the staggered yokel, "but there's yer mother outside wi' a barrer!"—London Scraps.

The Raising of Rice.

The cultivation of rice extends back into the dim past, and there are no authentic records as to when it first began. Evidence points, however, to the Chinese having been among the earliest people to cultivate it, and such great value was attached to it that in the annual ceremonial sowing of important plants inaugurated by the Emperor Chinnong so far back in the past as 2800 B. C. the rice had to be sown only by the emperor himself, while the four other plants of the ceremony might be sown by the princes of his family. In India rice has been cultivated from time immemorial. It was introduced at an early period into Syria, Egypt and other parts of northern Africa. In more modern times rice has been sown in Spain, France and Italy, the first cultivation in the last named country being stated to have been near Pisa in 1468. The plant is believed to have been introduced into America in 1647, when Sir William Berkeley raised a crop of sixteen bushels from half a bushel of seed.

The Waiter's Tip.

"Splitting a five dollar bill with a waiter when you reach a hotel and promising him the other piece when you leave if well served is a poor game," said a veteran waiter in one of New York's biggest hotels.

"A man tried it on me once, and it made me sore. I took pains to serve him poorly, showing that I did not care for his money. I was so careless that when he was leaving he refused me the other half. I had him sized up for a cheap skate, so I pointed out to him that the piece he had was no good to him as it was and offered to buy it from him for $2. He thought deeply a minute and declined. Then I offered to sell my half for $3. Somehow or other this appealed to him, and he bought it and seemed happy. I'll bet he hasn't stopped figuring out yet whether he won or lost. One thing he's sure of—he didn't tip the waiter."—New York Sun.

We were glad to receive a letter yesterday from our old friend, Miles E. Osmer, who is making lots of dollars out at Oberlin, Ohio. It contained a welcome atmosphere of school days and the times when Miles was one of the best baseball players in Bellefonte. Tucked away in the letter was a $1 bill, with an order to send "The Republican" during the coming year.
